

# Washington Architectural Hardware Announces a New Door Hardware Preinstall Division

*For both Wood and Metal Doors*

- Save time, money, and frustration with our expert service!
- We will take your project hardware, match it to the correct door and install it according to the manufacturer's directions.
- Our installers have over 30 years of hands-on experience. We have the setup and tools to provide professional installation in record time.
- Eliminate the busy worksite confusion that often results in the wrong hardware on a door or hardware being installed incorrectly. Our vendors tell us that 80% of door and hardware problems are caused by installation issues. Let us take care of it all for you!
- Your doors will be carefully packaged and delivered to your site ready to install!

**Contractors Agree:** "Today I went on a punch walk for the doors, frames and hardware in 2SA with a representative from NBBJ and their hardware consultant. The walk went extremely well and there were very few issues. The consultant said that this was some of the best work she had seen and was thoroughly impressed."

*—David Moore, Project Engineer, Mortenson Construction*
